

GREENLIGHT | ED

Monitoring and community care for students, faculty, and family.

PARTNERS

GreenLight | Ed

GreenLight provides a full suite of tools to schools to safely operate education and athletic programs during the covid-19 pandemic.

Greenlight evolved from the Pandemic Response Network and the proven ability to manage outbreaks among a community population through self-reporting and digital monitoring tools.

Greenlight is directed by the clinical guidance of Duke Physicians from, Infectious Disease, Population Health Medicine, Duke Heart, Critical Care and Pediatrics.

Greenlight Lives in an App

For Teachers & Parents / Students

- 1 Complete Daily Symptom Monitoring to ensure everyone who arrives is healthy
- 2 Find streamlined access to triage and testing at Duke Health
- 3 Reach support services that have been made available by the state and the city of Durham.
- 4 Reach out to local, NC-licensed RNs experienced for any COVID related questions
- 5 Access local COVID case trends

You Own Your Data

- Users may revoke access to their data or purge their data at any time.
- The only information shared with your employer is the color of your Greenlight response and the name (or alias) you provide.
- Greenlight runs on a HIPAA and FERPA compliant managed cloud.
- Greenlight makes no use of third-party analytics services such as Google Analytics.

Proven Results at Scale

Duke Hospital has run without disruption

20,000+ employees have safely treated patients without interruption during the pandemic

Duke University has not seen a major outbreak

While other universities have been forced to close, Duke has safely continued in-person classes for 15,000+ students and staff.

The Pandemic Response Network has helped keep users safe and healthy nationwide

7,500+ users across 40 states, 5 countries, and 2 languages have given the Pandemic Response Network a 92% satisfaction score
